

Air 1 radio which broadcasts on 90.1 in our local area truly serves me -- I listen to their great progressive music every morning on my way to work. If Air 1 was replaced by an LPFM broadcaster it would be devastating not only to me but also many other people I know who listen to Air 1.

Air 1 is a fantastic radio broadcast that is listener supported and as such has no commercials which makes it great to listen to. If you every visit our area you will see how many Air-1 stickers are on the cars out here.

Please don't expand the LPFM service to take priority over stations like Air 1.

Thanks,
Mark
